Survey Summary and Description

The Connecticut School Health Survey (CSHS) is a comprehensive survey that consists of two components: the Youth Behavior Component (YBC) and the Youth Tobacco Component (YTC). In the fall of 2015, the Youth Behavior Component of the Connecticut School Health Survey was administered to students in Wallingford, CT high schools. The survey was previously administered in the fall of 2013. The survey is developed by the Centers for Disease Control and Prevention (CDC) and nationally, the survey is known as the Youth Risk Behavior Survey (YRBS). The 2013 and 2015 versions were modified by the Connecticut Department of Public Health and the State Department of Education for statewide use. For Wallingford, it was further modified both years by representatives of municipal departments and community organizations.

In 2015, 1,682 Wallingford high school students participated in the YBC. The survey was available in English or Spanish. The overall student response rate was 87.7% (88.6% at Lyman Hall High School and 87.0% at Sheehan High School). Student non-response was attributed to parental non-consent, student non-consent, absenteeism, field trips or ineligibility (e.g., special education or english-language learners). When applicable, a comparison is provided with results from the statewide sample administered to public high schools in the spring of 2015, and the Wallingford survey from 2013.

The demographic characteristics of the participating students were as follows:

Academic Performance

86.4% of Wallingford students describe their grades in school as mostly A's or B's during the past 12 months.

Comparison with Wallingford results in 2013: 81.1%

Comparison with Connecticut results in 2015: 70.6 - 80.5%

In a classroom of 30 students, that's approximately 26 students.

Summary Statistics

Females	Males
89.6%	82.4%

9 th Grade	10 th Grade	11 th Grade	12 th Grade
91.4%	85.8%	84.0%	84.6%

Sheehan High School	Lyman Hall High School
87.0%	85.9%

General Health

67.5% of Wallingford students describe their health as excellent or very good.

Comparison with Wallingford results in 2013: 64.8%

Comparison with Connecticut results in 2015: 58.5 - 65.7%

In a classroom of 30 students, that's approximately 20 students.

Summary Statistics

Females	Males
64.8%	70.8%

9 th Grade	10 th Grade	11 th Grade	12 th Grade
70.3%	69.9%	66.1%	63.8%

Sheehan High School	Lyman Hall High School
70.2%	65.8%

General Health

13.8% of Wallingford students most of the time or always wore sunscreen with an SPF of 15 or higher when outside for more than 1 hour on a sunny day.

Comparison with Wallingford results in 2013: 10.4%

In a classroom of 30 students, that's approximately 4 students.

Summary Statistics

Females	Males
17.8%	8.9%
